Exceptional Dental Bonding & Cements

Friday, September 19, 2025 | 8:00 AM-12:00 PM CST

Drury Plaza Hotel Cape Girardeau Conference Center
3351 Percy Drive Cape Girardeau, MO 63701

Cost: Complimentary
Kerr provides all course materials.

In today's busy general practice, the most used materials are composites for direct restorations. The evolution of that category of materials is amazing, today's composites and cements are light years ahead of the materials that we thought were great 20 years ago. The changes in the translucency and in the ability to match the existing tooth color are a major advancement. This course is designed for the busy dentist who wants to stay current with the available materials and concepts of tooth-colored restorations. We will discuss what matters most in composite and cement selection, depending upon location and occlusal load placed on the restoration. Materials and procedures for placement of the composites that will eliminate post-operative sensitivity, will be addressed. The current state of resin bonding agents and the protocol for utilizing these materials in your day-to-day practice, not only for composite placement but for all of your bonded restorations will be covered.

Learning Objectives:

- Understand the current materials and capabilities of composites.
- Know what composite materials are available and the limitations of each.
- Understand the current generation of bonding agents and cements.

Presented by: Dr. Scott Coleman

Dr. Scott Coleman's institutional education and intensive continuing education have elevated him to the top of his field. After graduating first in his class at the University of Texas Dental Branch in 1984, he entered private practice in his hometown of Houston. He currently serves as a clinical adjunct professor at the UT Health Science Center at Houston School of Dentistry. His expertise and proficiency in cosmetic and restorative dentistry have created demand for him not only in the dental office but on the national and international lecture circuit as well. Dr. Coleman has written articles on dental techniques that have been published in trade journals, and he is a certified Cerec trainer for Patterson Dental Supply Company. He holds Fellowships and Masterships in numerous professional academies of dentistry, and has served on the board of directors of many of those organizations, including past president of the Academy of General Dentistry.
